PROFESSIONAL SUMMARY

Cybersecurity-focused IT student with hands-on experience in vulnerability assessment, network analysis, security research and practical cybersecurity labs. Familiar with Linux/Windows environments, networking fundamentals, SIEM concepts and security tools. Strong analytical and problem-solving skills with experience researching technical issues and documenting findings. Seeking entry-level opportunities in cybersecurity, SOC/Blue Team, network security and related IT security roles.

EDUCATION

Azerbaijan University of Architecture and Construction (AzMİU) — B.Sc. Information Technology, Information Security / Cybersecurity Focus | Expected 2028 | Academic Average: 85.2/100

Relevant coursework: Programming, Computer Networks, Linux Fundamentals, Information Security

Holberton School Azerbaijan — Cybersecurity Program | Cybersecurity assessment: 83% | General English assessment: 86%

CYBERSECURITY PROJECT

Vulnerability Research & Exploitation Lab | Kali Linux, Nmap, Nessus, NVD, Metasploit, Meterpreter, John the Ripper

- Performed network reconnaissance and service enumeration against an isolated vulnerable Windows 7 SP1 x64 environment using Nmap.
- Conducted vulnerability assessment with Nessus and identified MS17-010 / EternalBlue and other security weaknesses.
- Researched CVE-2017-0144 / MS17-010 using NVD, including CVSS, impact and mitigations.
- Validated MS17-010 in a controlled lab using Metasploit; established a Meterpreter session and documented findings in GitHub.
- Performed post-exploitation enumeration and extracted Windows NTLM password hashes; cracked two recovered hashes using John the Ripper.

TECHNICAL SKILLS

Cybersecurity: Vulnerability Assessment, Network Security, Security Research, Web Security, SOC / Blue Team Fundamentals

Security Tools: Nmap, Nessus, Metasploit, Meterpreter, John the Ripper, Hashcat, Wazuh, QRadar, SQLmap, Subfinder, Burp Suite

Networking: TCP/IP, DNS, HTTP/HTTPS, TCP/UDP, Ports & Services, SMB, Network Enumeration

Systems: Kali Linux, Linux, Windows, Termux, VirtualBox / VMware

Programming: Python, Bash, PHP, HTML, CSS, JavaScript Fundamentals, Git / GitHub

Analysis: Basic SQL, Analytical Problem Solving, Technical Documentation

CERTIFICATIONS & TRAINING

Ethical Hacking Fundamentals — Coursera, 2026 | Introduction to Cyber Security — Cisco Networking Academy, 2026 | CompTIA Security+ — Preparation / In Progress

PRACTICAL PLATFORMS

TryHackMe | OverTheWire (Bandit) | OWASP Juice Shop | Metasploitable | Cybersecurity Labs

LANGUAGES

Azerbaijani — Native | English — B1–B2
